Brand Safety Report v2 · interactive prototype + component library

The augmented screen below shows every **new** v2 component in real product context. Each new component carries a **purple pin** when annotations are on — hover to see the JSON field it binds to plus its supported states. Toggle `State` to see all v2 components in **loading** or **error** states. The **Tweaks** panel (bottom-right) lets you switch personas, hide the engine badge, or disable the Custom Questions tab to test graceful degradation.

BRAND **Skyline Family Airlines** · Family travel

Q PRESET **Family-friendly Travel Vetting** 5

AI Summary

Maya's content is high-production travel and luxury hospitality. It is largely brand-safe for family travel positioning, but contains 3 distinct risk vectors: occasional political commentary that conflicts with neutral-positioning guardrails, presence of a minor in 2 adult-themed venues (pool club, late-night dinner), and recurring positive mentions of two competitor airlines. No legal flags, no profanity in caption, low overall sentiment polarization.

Review: Manually review posts P-014, P-031, P-089 before partnership. Political commentary may need disclosure adjustment.

Review: Confirm child appearances are with permission and reframe family-context posts to fit campaign brief.

Approve: All travel-aspirational and hospitality content is on-brand and ready for adaptation.
